Das Geschenk des Rheins

# DAS GESCHENK DES RHEINS

## 来自莱茵河的高贵基因

**"Das Geschenk des Rheins"**，德语寓意莱茵河的恩赐。莱茵河是德国最长的河流，流域面积占德国总面积的 40%，是德国的摇篮。莱茵河是具有历史意义和文化传统的欧洲大河，也是世界上最重要的工业运输大动脉之一。诞生于莱茵河畔的莱恩国际，得益于德国领先的工业技术，继承了德国工艺的优秀基因，并将莱恩国际独到的见解融入到产品当中，用每一件产品服务好消费者，回报来自莱茵河的恩赐。

**"Das Geschenk des rheins"**，German means the gift of Rhine. Rhine River is the longest river in Germany, with drainage area accounting for 40% of the total area of Germany, and it is the cradle of Germany. Rhine is a European river with historical significance and cultural tradition, and also one of the most important industrial transportation arteries in the world. Born on the Bank of Rhine, Rhine international benefits from Germany's leading industrial technology, inherits the excellent gene of German technology, integrates Rhine's unique insights into products, serves consumers well with each product, and returns the gifts from Rhine.

Only the pure aesthetic feeling and the unique design can touch the soul's vision.

# GERMAN CUTTING EDGE TECHNOLOGY

用匠心 做精品

## 防水灌胶 Waterproof glue pouring

1. 针对国内卫生间干湿不分离现状，按国标 IPX4 防水等级设计
2. 主控板等主要零部件采用灌胶技术，有效防止线路短路
3. 防水防潮设计，确保马桶在潮湿环境使用安全与可靠

1. According to the current situation of non separation of wet and dry toilet in China, it is designed according to the national standard IPx4 waterproof grade
2. Glue filling technology is adopted for main parts such as main control board to effectively prevent short circuit of lines
3. Waterproof and moisture-proof design to ensure the safe and reliable use of the toilet in wet environment

## 不锈钢喷杆 Stainless steel spray bar

独特的角度设计，优化清洗范围，使喷杆不必伸出太多依旧能实现相同的冲洗效果，采用 304 不锈钢喷杆，使用起来更卫生、更容易。

喷管入水前水路增加过滤装置，过滤装置要求可以过滤掉大于 0.5mm 直径杂质和絮状杂质。

The unique angle design optimizes the cleaning range so that the spray bar does not have to extend too much to achieve the same flushing effect. The 304 stainless steel spray bar is more sanitary and easy to use.

Add a filter device in the water path before the nozzle enters the water. The filter device is required to be able to filter out impurities larger than 0.5mm in diameter and flocculent impurities.

## 人体工程学恒温坐圈 Ergonomic constant temperature seat

1. 着座面平缓，受力均匀且舒适，适合不同体态的使用者
2. 座圈采用阻燃材料
3. 采用摩擦焊技术，座圈密封性更好，减少水汽进入
4. 座温设有常温，夏日也有凉爽体验
5. 座圈内置加热装置，4 档温度调节

常温	中档 (36±2℃)
低档 (32±2℃)	高档 (39±2℃)

1. The landing surface is smooth, the stress is even and comfortable, and it is suitable for users with different posture
2. The seat ring is made of flame retardant material
3. Friction welding technology is adopted to improve the sealing performance of the seat ring and reduce the water vapor entering
4. The seat temperature is set with normal temperature and cool experience in summer
5. The seat ring is internally heated with aluminum foil, and the temperature can be adjusted in four grades

Normal temperature	Medium grade (36 ± 2 °C)
Low grade (32 ± 2 °C)	High grade (39 ± 2 °C)

## 长距遥控 Long distance remote control

遥控距离长达 8m，灵敏便捷，适合各种大小卫生间，使用更广泛。

Remote control distance up to 8m, sensitive and convenient, suitable for all sizes of toilets, more widely used

# CLEAN LIFE

五大智能系统 开启洁净生活

Five intelligent systems  
open clean life

## 01 精准识别 Precise Identification

电容式着座传感器，智能识别是否有人坐在座圈上，避免无人着座时，误操作导致喷嘴乱喷水。

The capacitive seat sensor can intelligently identify whether someone is sitting on the seat ring, so as to avoid the spray of nozzle caused by misoperation when no one is sitting.

## 02 自动除臭 Automatic Deodorization

人着座后，即开启自动除臭功能（出厂设置时，自动除臭功能为关闭状态，需通过遥控器操作开启），通过风机吸走臭气，再由活性炭统一处理，最后排出新鲜的空气。

After the person is seated, the automatic deodorization function is turned on (when the factory is set, the automatic deodorization function is turned off, which needs to be turned on through the remote control operation), the odor is sucked out by the fan, then treated by the activated carbon in a unified way, and finally the fresh air is discharged.

## 03 着座润壁 Wetting Surface

人着座后，裙边冲水口会对陶瓷壁进行一个湿润，避免粘黏。

After the person is seated, the skirt edge flushing port will moisten the ceramic wall to avoid sticking.

## 04 喷头自洁 Self Cleaning

人着座后，清洗器喷头会自动清洗，确保每一次清洗喷头的洁净（若需要人工进行清洗，可以开启喷头清洁功能，喷头自动伸出且不会喷水，方便人工清洗）

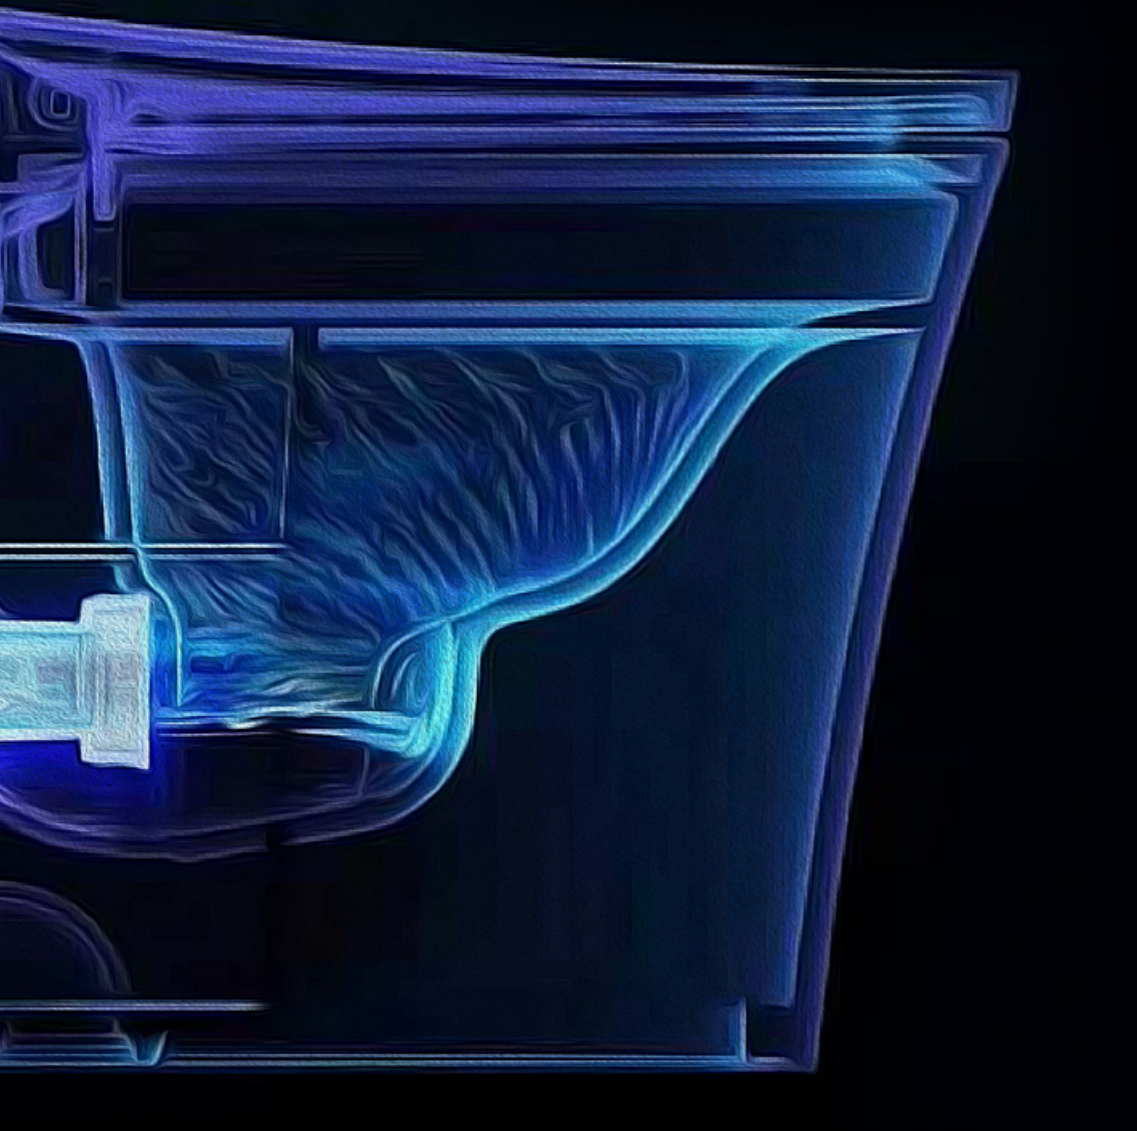

After the person is seated, the washer nozzle will clean automatically to ensure the cleanness of each cleaning nozzle (if it needs to be cleaned manually, the cleaning function of the nozzle can be turned on, and the nozzle will stretch out automatically without spraying water, which is convenient for manual cleaning)

## 05 智能冲水 Intelligent Flushing

人离座后，即进行自动冲水功能（冲水方式有两种，分为大冲和小冲，人离座之后冲水为大冲，长按旋钮 3 秒以上启动小冲模式，真正做到省水节水）

After the person leaves the seat, the automatic flushing function is carried out (there are two flushing modes, i.e. big flushing and small flushing. After the person leaves the seat, the flushing is big flushing. Long press the knob for more than 3 seconds to start the small flushing mode, so as to save water and water)

# 0-PRESSURE SYSTEM

智能零水压冲刷系统

更稳定 · 更节水 · 更时尚

智能冲水

Intelligent Zero Water Pressure Scouring System

## 零水压，冲水无压力 Zero water pressure, no pressure for flushing

告别高层建筑、老式小区、用水高峰水压低的问题，0-PRESSURE SYSTEM 不受水压影响，新旧小区，自建房均适用，同时具备冲水无飞溅现象，喷嘴下方底板不易粘污物，无电情况机械式冲洗等优势。

Bid farewell to the problem of low peak water pressure in old residential quarters of high-rise buildings. E-shiin system is not affected by water pressure. It is applicable to new and old residential quarters and self built houses. At the same time, it has the advantages of no splash in flushing, no dirt on the bottom plate under the nozzle, Mechanical flushing without electricity, etc.

**0-PRESSURE SYSTEM 系统**作为全新冲刷系统，可以满足人们单、双档节水、机械冲水静音、水压适用性等要求，打破传统陶瓷设计，领跑行业前沿，以独创专利设计获得全球领先。

As a new flushing system, 0-PRESSURE SYSTEM system can meet the requirements of single gear water saving, Mechanical flushing mute, water pressure applicability, etc., break the traditional ceramic design, lead the industry, and obtain the world's only original patent design.

# RAPID HEATING

## 陶瓷加热管一秒速热

即热式陶瓷加热管，即便进水是低至 5 度的冰水，也可在一秒内加热到 35 度，在寒冷的冬季也带着最贴心的呵护。温度控制稳定，采用瞬间加热维持恒定温度（不用内置水箱储藏加热水），冲洗时不会感觉到水温有任何下降，更加卫生、省电；水温控制采用特殊的加热算法，冲洗温度控制稳定，在冲洗过程中不会感觉温度的跳动。

That is to say, the hot ceramic heating pipe can heat to 35 °C in a second even if the water is ice water with a temperature as low as 5 °C . It also takes the most intimate care in the cold winter. The temperature control is stable, the instantaneous heating is used to maintain the constant temperature (the heating water is not stored in the built-in water tank), and no drop in the water temperature will be felt during flushing, which is more sanitary and power-saving; the special heating algorithm is used for the water temperature control, and the flushing temperature control is stable, and the temperature jump will not be felt during flushing.
